

Making Sense of Evidence Workshop

Find and use evidence to make effective health and social care decisions

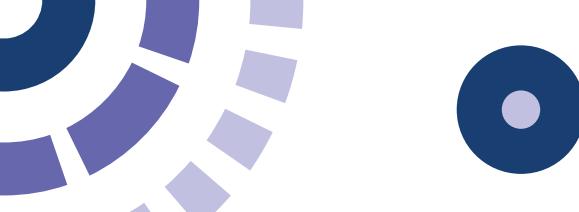

At PenARC we believe that better health and care can be provided to patients and the public by making decisions that are based on evidence.

Our free to attend Making Sense of Evidence workshops are designed to teach you how to find and use evidence to make effective health and social care decisions. They are open to all clinicians, allied health professionals, managers, and other health and care colleagues.

Our workshops cover:

- Formulating a focused question
- Tracking down and organising the best evidence
- Gaining experience of critically appraising the evidence
- Understanding the application of evidence in practice
- Evaluating the effectiveness and efficiency of your educational process

Types of courses

We offer full and half day courses as well as bespoke sessions tailored to suit your team's individual needs and experience. Blended delivery options are also available offering a mixture of face-to-face and interactive on-line sessions. All of our courses are fully funded.

Course features:

- An interactive teaching style
- A supportive learning environment
- Highly experienced tutors
- Small groups with high tutor-to-delegate ratio

Feedback from workshops:

“A good day, thank you with helping me to understand this difficult subject matter”

“A fantastic, concise introduction with good pointers on where to go next to keep learning. Thank you for a very good and interesting discussion.”
