Integrative Sciences

Science and Society  
Science Communicationscience communication  
social networks  
public understanding of science

## Abstract

There have been strong calls for scientists to share their discoveries with society. Some scientists have heeded these calls through social media platforms such as Twitter. Here, we ask whether Twitter allows scientists to promote their findings primarily to other scientists (“inreach”), or whether it can help them reach broader, non-scientific audiences (“outreach”). We analyzed the Twitter followers of more than 100 faculty members in ecology and evolutionary biology and found that their followers are, on average, predominantly (~55%) other scientists. However, beyond a threshold of ~1000 followers, the range of follower types became more diverse and included research and educational organizations, media, members of the public with no stated association with science, and a small number of decision-makers. This varied audience was, in turn, followed by more people, resulting in an exponential increase in the social media reach of tweeting academic scientists. Tweeting, therefore, has the potential to disseminate scientific

## Abstract

Twitter: “*it's like having a little part of you that's always down the pub*” (@dougald)  
.....or in the conference bar

# Twitter Myth

## You can't say much in ~~140~~ 280 characters

“Insanity: doing the same thing over and over again and expecting different results.”

“Our scientific power has outrun our spiritual power. We have guided missiles and misguided men.”

“Education is the most powerful weapon which you can use to change the world.”

# Tackling Twitter

- You need to understand why you are using Twitter
- You need to understand the benefits of using Twitter
- You need to understand the side-effects of social media
- You need to understand that the benefits may take time in coming
- Today may not be the day you start using Twitter

Do not feel pressured to use it - as it won't work

# How Twitter has helped me

- Teaching Senate Award for ScHARR MOOCs
- Help created my own personal learning network
- Helps share my outputs to my professional network
- Invitations to deliver talks, papers and edit a book (my profile and expertise would be far less visible without Twitter - so less invitations)
- Was part reason I was named in Jisc's Top Ten Social Media HE list for 2017

# **Social Media & Professor Allan Pacey**

“See social media as part of one continuum, it is the spine of what I do”

“Puts a human face to your professional profile, helps public and patients see who I am, some patients follow my updates”

Recent £750,000 MRC Grant aided by solid impact statement backed by strong public profile - “Referee’s comment was I cannot fault it”

“Helps me stay top of my game”

Replying to [@Andy\\_Tattersall](#) [@AlisonMcNab](#) and 2 others

Hi Andy, what exactly do you mean with "collect research impact"? Indicators? Ways to archive evidence of impact? Something else?

1

**Andy Tattersall** @Andy\_Tattersall · 6h

I'm thinking of curating artefacts - web clippings - such as media attention beyond altmetric scores, as not all attention is picked up by altmetrics. A virtual scrapbook for logging any kind of research impact beyond citations

1

**Bi@nca Kramer** @MsPhelps · 4h

Something like [@Impactstory](#) supplemented with info from a tool like Webometric Analyst [lexiurl.wlv.ac.uk](http://lexiurl.wlv.ac.uk)? cc [@mikethelwall](#) Or are you also specifically looking at archiving?

# The one function on Twitter you aren't told enough about

# Former footballer-turned-boxer Curtis Woodhouse drives to home of Twitter troll to confront him over months of abuse

By [JOE RIDGE FOR MAILONLINE](#) 

**PUBLISHED:** 10:47, 12 March 2013 | **UPDATED:** 13:01, 14 March 2013

 **44**  
View comments

Former footballer-turned-boxer Curtis Woodhouse has been championed by the likes of Lennox Lewis and John Prescott after he put a Twitter troll in his place by driving to confront him on his doorstep.

The ex-England Under 21 player lost his English light-welterweight title on points to Shane Singleton on Friday night and he was branded a 'disgrace' on the social networking site by 'Jimmyob88', who has reportedly been abusing Woodhouse on Twitter for months.

The 32-year-old former tough-tackling midfield midfielder - who switched sports to boxing aged 26 - was so enraged with the abuse that he offered £1,000 to anyone who could help him

Don't be afraid.....to say no

Or at least point them to the right social network

# What to Tweet?

- Publication (book, report, paper, proceedings)
- Presentation
- Idea
- Resource
- Conversation (ice breaker)
- Funding Bid
- Professional achievement
- Link

# Timing is everything

Especially if you are Tweeting at an international audience

## Time

**NEW!** This bar chart shows the activity time based on the latest tweets. Careful about timezones.

HUMANS TEND TO SLEEP

**NOTE** Timezone shown is UTC+0. Current UTC time is 16:25:48 +0000. The [world clock](#) can help you compare different timezones. If the tweets are spread evenly across the full 24 hour span, chances are that it's been set up to tweet automatically.

# Social Media & Professor Trish Greenhalgh

Professor of primary health care

“I’ve got my last two PhD students from Twitter”

“I’ve got my most recent research collaboration from Twitter”

“I was invited to edit a major new journal article series via a message on Twitter”

“Our paper ‘EBM – a movement in crisis’ was the most highly cited paper in the BMJ in 2014 directly because of a targeted twitter campaign to promote it.”

# Social Media & Dr John Holmes

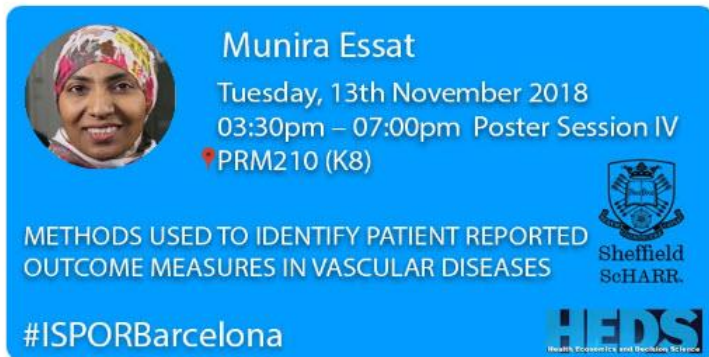

“Twitter has been useful for sustaining and building relationships with academics outside Sheffield. It provides a starting point for conversation at conferences, a sense of the interests of potential collaborators and a way of identifying who the people you should be talking to are.

Although trolls are generally to be avoided, those hostile to public health perspectives are not all trolls. Engagement with those people is useful as it exposes you to different perspectives on your work, can help you understand how it is regarded by those outside the scientific and public health community, identify the key criticisms of your work (and the best way to respond to them) and lead you toward new research questions and ideas. In short, it helps you think about public health outside of a lefty, state intervention, received wisdom on 'what works' paradigm.”

### **What is it?**

An easy to use infographic and poster maker that allows you to visualise information in visually appealing ways

### **What platforms does it work on?**

Web based so accessible on a range of platforms. iPad app available for tablets  
Best in Chrome or Firefox, works in IE, can be issues in older browsers

### **How much does it cost?**

Ranger of packages from Free to \$119.40 a year for Pro.

### **How do I get it?**

<https://www.canva.com/>

### **What can I use it for?**

Visualising data, creating reports. Regular reports, survey results, feedback, marketing.

### **How easy is it to use?**

Easy to use templates and themes that can be tailored and adjusted. Easy drag and drop function in editor that allows you to alter most aspects of a chart. You can sign in using your University of Sheffield credentials.

### **Are there support materials?**

Marketplace- <https://www.canva.com/templates/>

Video tutorials- <https://designschool.canva.com/tutorials/>

# DIAGRAM OF THE CAUSES OF MORTALITY IN THE ARMY IN THE EAST.

2.  
APRIL 1855 TO MARCH 1856.

1.  
APRIL 1854 TO MARCH 1855.

*The Areas of the blue, red, & black wedges are each measured from the centre as the common vertex.*

*The blue wedges measured from the centre of the circle represent area for area the deaths from Preventible or Mitigable Zymotic diseases; the red wedges measured from the centre the deaths from wounds; & the black wedges measured from the centre the deaths from all other causes.*

*The black line across the red triangle in Nov. 1854 marks the boundary of the deaths from all other causes during the month.*

*In October 1854, & April 1855, the black area coincides with the red; in January & February 1856, the blue coincides with the black.*

*The entire areas may be compared by following the blue, the red & the black lines enclosing them.*

# Time Series Infographic

*Carte Figurative* des pertes successives en hommes de l'Armée Française dans la campagne de Russie 1812-1813.  
 Dessiné par M. Minard, Inspecteur Général des Ponts et Chaussées en retraite. Paris, le 20 Novembre 1869.

Les nombres d'hommes présents sont représentés par les largeurs des zones colorées à raison d'un millimètre pour dix mille hommes; ils sont de plus écrits en travers des zones. Le rouge désigne les hommes qui ont été en Russie, le noir ceux qui en sont sortis. Les renseignements qui ont servi à dresser la carte ont été puisés dans les ouvrages de M. M. Chiers, de Légar, de Fezonzac, de Chambray et le journal inédit de Jacob, pharmacien de l'Armée depuis le 28 Octobre. Pour mieux faire juger à l'œil la diminution de l'armée, j'ai supposé que les corps du Prince Jérôme et du Maréchal Davout qui avaient été détachés sur Minsk et Mohilow et ont rejoint vers Orscha et Witebsk, avaient toujours marché avec l'armée.

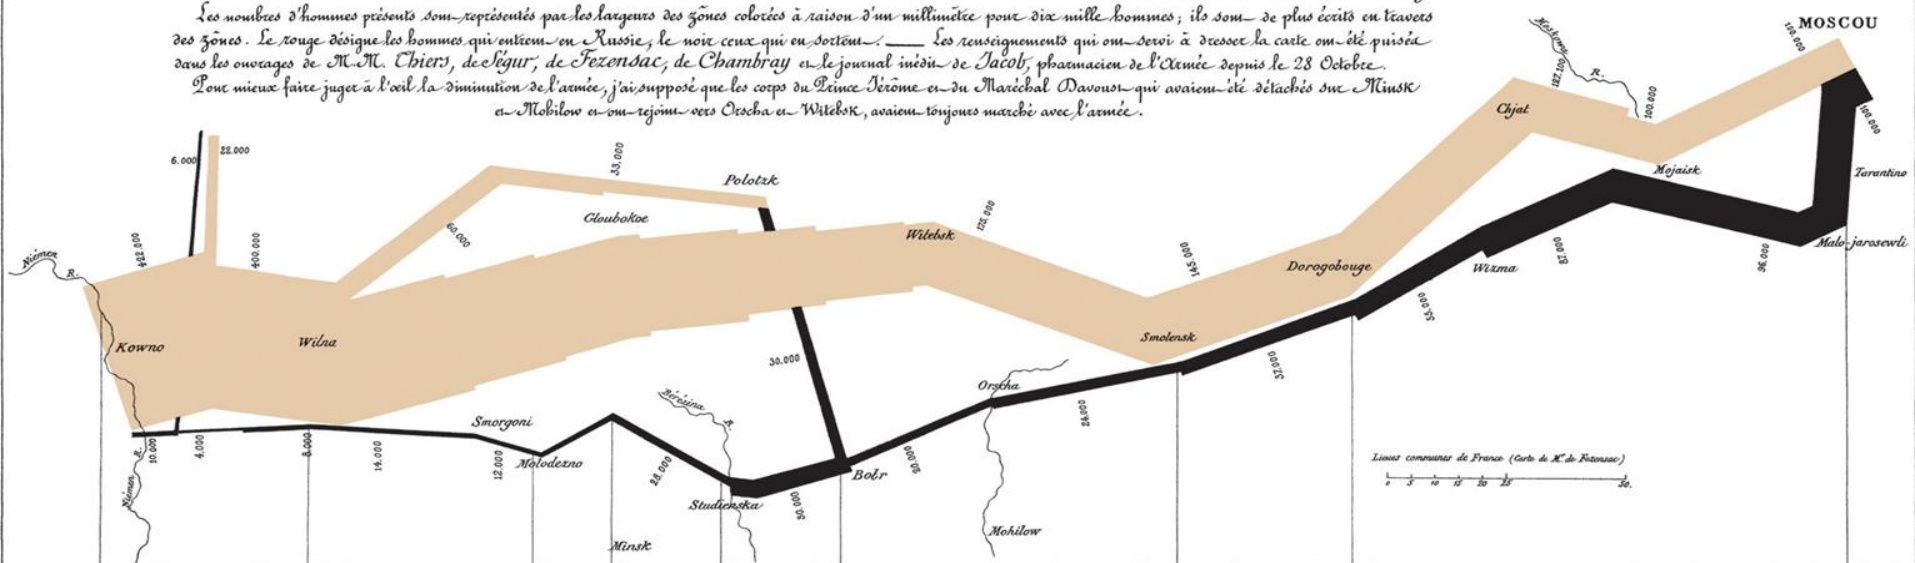

TABLEAU GRAPHIQUE de la température en degrés du thermomètre de Réaumur au dessous de zéro.

Auq. par Reignier, 9. Par. 5<sup>me</sup> Marie 5<sup>me</sup> 0<sup>me</sup> à Paris.

Imp. Lit. Reignier et Doucet.

“Laurie Frick turns data into an aesthetic. The artist, who has tracked her daily activity for the better part of a decade, abstracts her personal data (walking, sleeping, and less quantifiable information like stress levels) into geometric sculptures and paintings.”

Getting your intranet strategy right: A step-by-step guide to developing a robust and highly effective intranet strategy

## Graphical displays should

- Show the data
- Induce the viewer to think about the substance rather than about methodology, graphic design, the technology of graphic production, or something else
- Avoid distorting what the data have to say
- Present many numbers in a small space
- Make large data sets coherent
- Encourage the eye to compare different pieces of data
- Reveal the data at several levels of detail, from a broad overview to the fine structure
- Serve a reasonably clear purpose: description, exploration, tabulation, or decoration
- Be closely integrated with the statistical and verbal descriptions of a data set.

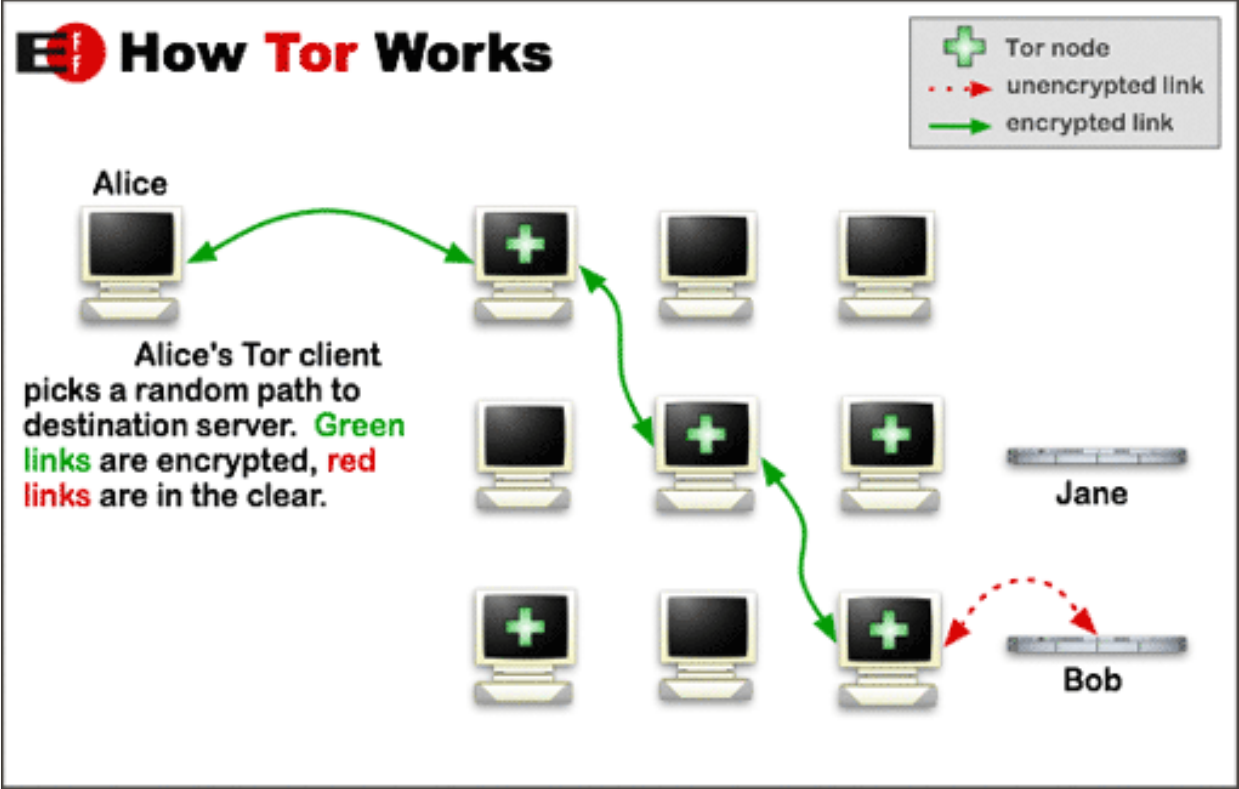

# What an Infographic does

- Relays (often complex) information in a simple and visual way
- Displays clear difference or contrast between multiple pieces of information
- Helps readers digest information in a quick and simple way
- It helps a reader understand the hierarchy of information - it leads the reader through the information - especially when delivered as a roadmap or storyboard
- An infographic takes the most important elements of a piece of information and relays it quickly

# Map based infographic

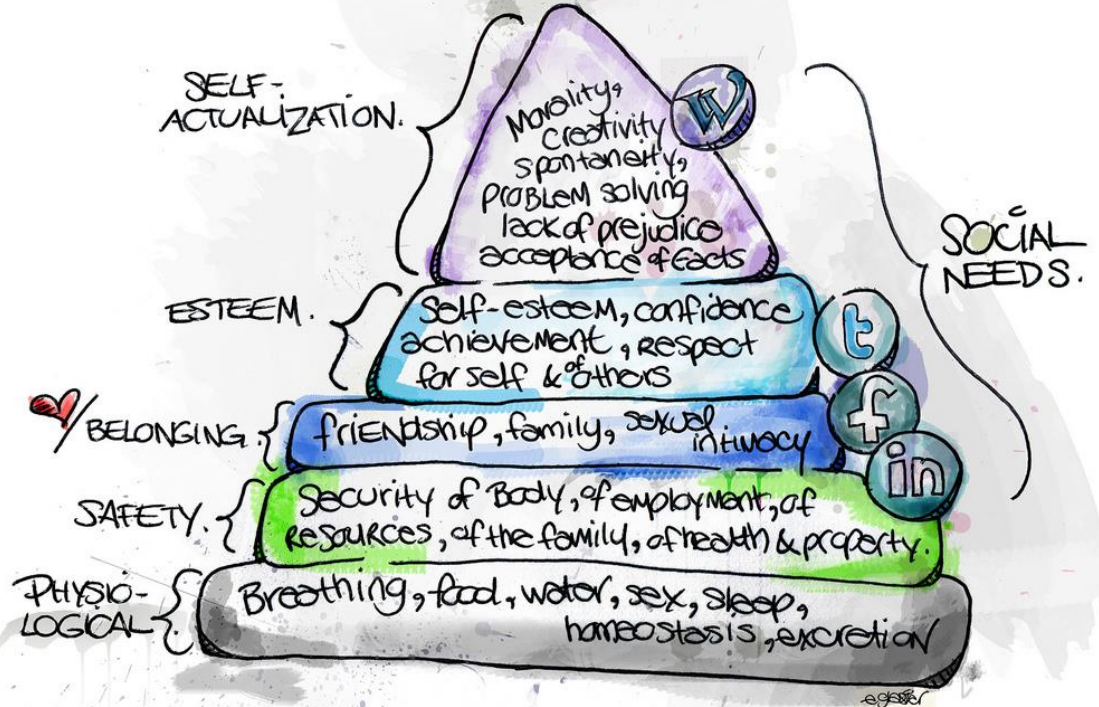

# Network based infographic

# Hierarchical based infographic

MASLOW'S HIERARCHY OF NEEDS\*  
\*AND THE SOCIAL MEDIA THAT FULFILL THEM.

# Informational based infographic

# IRISS

Information Resources Information Study Skills

How we help ScHARR's students develop into the next generation of researchers and research-users

## Why IRISS?

### Baseline Skills

We found that students arriving on our Masters courses lacked basic information study skills and were not well prepared for the demands of their course

### Skills after IRISS

IRISS gives students the basic skills they need to find, collect, manage and share information effectively

## Four Key Skill Areas

### FIND

Find information using databases, library catalogues and the web at large

### COLLECT

Collect the full-text versions of information sources, both on and off-line

### MANAGE

Manage your references using tools such as Reference Manager and Mendeley

### SHARE

Share your findings and collaborate and network with colleagues around the world

## Delivering the Skills

Students receive taught face-to-face sessions embedded in the teaching timetable

These sessions are recorded and made available online for repeated viewing

Appropriate external resources are collated and made accessible for our students

All these resources are embedded in the student's virtual learning environment

## What our students think:

**88%**

Feel their skills have improved in all four areas

**91%**

Feel the skills will improve their academic performance

**90%**

Felt the course had met its objectives

The size of the Mobile market

# Chart based infographic

Chart shows the number of mobiles for every 100 people within that country, for example: in United States there are 48.81 mobiles for every 100 people

# Statistical based infographic

# Comparison based infographic

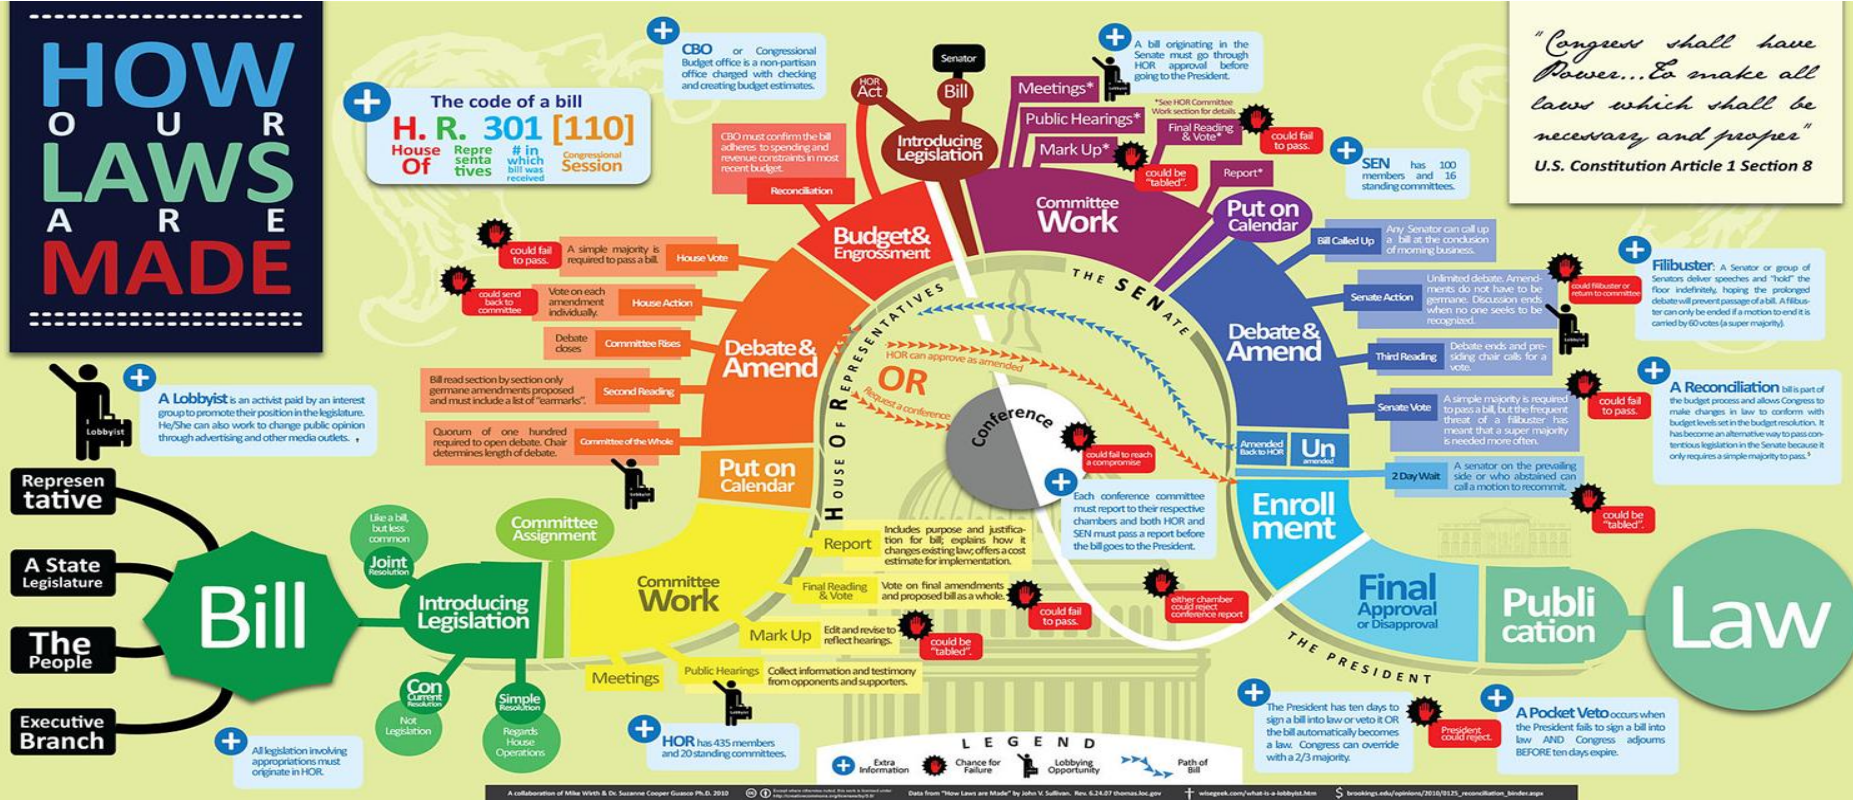

## HIGHEST PEAKS of EACH CONTINENT

## Seven Summits

The Seven Summits are the highest mountains of each of the seven continents. Summitting all of them is regarded as a mountaineering challenge, first postulated as such and achieved on April 30, 1985 by Richard Bass.

# Process based infographic

# Making your first infographic

- Keep it simple
- Ask colleagues for feedback (does it make sense?)
- Think of your audience
- Think of an eye catching title
- Fact check
- Cite your facts
- Link those facts
- Add your contact and social media links
- Try to be consistent in your output
- Ensure you can print it out (think of size and pixel quality)
- Once you have completed it - promote it

# The NSW Health system is...

\* Nursing headcount figures at June includes non casual staff and 3rd schedule

NSW Ministry of Health March 2013

**Piktochart**  
make information beautiful

**Piktochart**  
make information beautiful

### **What is it?**

An easy to use infographic maker that allows you to visualise information in visually appealing ways

### **What platforms does it work on?**

Web based so accessible on a range of platforms. iPad and Android app available for tablets  
Best in Chrome or Firefox, works in IE, can be issues in older browsers

### **How much does it cost?**

Ranger of packages from Free to \$24 month (individual licence) with \$39 a year for educator licence.

### **How do I get it?**

<https://piktochart.com/>

**Piktochart**  
make information beautiful

### **What can I use it for?**

Visualising data, creating reports. Regular reports, survey results, feedback.

### **How easy is it to use?**

Easy to use templates and themes that can be tailored and adjusted. Easy drag and drop function in editor that allows you to alter most aspects of a chart. You can sign in using your University of Sheffield credentials.

### **Are there support materials?**

Help centre- <http://support.piktochart.com/hc/en-us>

Video tutorials- <https://piktochart.com/video-tutorials/>

### **Case Studies?**

# What can Altmetric.com tell us about policy citations of research?

Andy Tattersall - a.tattersall@sheffield.ac.uk  
Dr Chris Carroll - c.carroll@sheffield.ac.uk

We tracked 96,550 research articles from The University of Sheffield and found that 1,463 had been cited in policy

Outputs by Faculty with at least 3 policy citations. n = 92

The Faculties of Arts and Engineering each had 0 citations

Good and bad apples - research with >5 policy citations assigned to Sheffield authors, n = 21

Policy citations from papers with 5 or more citations by research field. n = 117

n = 14 research outputs - 117 policy citations

Time lags between date of publication and first policy citation

<https://www.altmetric.com/details/13363657>  
November 4, 2016 - January 2017 2-3 months NICE

<https://www.altmetric.com/details/9760092/>  
October 1979 - June 2010 25 years WHO

<https://www.altmetric.com/details/9760092/>  
October 1979 - June 2010 31 years CDC

WHO, World Health Organization; CDC, Centers for Disease Control; NICE, National Institute for Care and Health Excellence

@Andy\_Tattersall  
@SchARRHEDS

Tattersall, A. Carroll, C. (2018) What can Altmetric.com tell us about policy citations of research? *Frontiers in Research Metrics and Analytics*. doi: 10.3389/frma.2017.00009

# Remember

Do not try and fit everything into the poster

Focus on your key findings

Do think of the audience (peers, clinicians, general public)

Think of what impact you are trying to make - promotional, societal, institutional, academic

Do not create a poster with more than two columns of information

Do use complementary colour schemes and use colour sparingly

## Explore / Creative Commons

Many Flickr users have chosen to offer their work under a Creative Commons license, and you can browse or search through content under each type of license.

Here are some recently added bits and pieces:

 Attribution-NonCommercial License

"Creative Commons is a non-profit that offers an alternative to full copyright."

[creativecommons.org](http://creativecommons.org)

### Briefly...

**Attribution means:**

You let others copy, distribute, display, and perform your copyrighted work - and derivative works based upon it - but only if they give you credit.

**Noncommercial means:**

You let others copy, distribute, display, and perform your work - and derivative works based upon it - but for noncommercial purposes only.

**No Derivative Works means:**

You let others copy, distribute, display, and perform only verbatim copies of your work, not derivative works based upon it.

**Share Alike means:**

You allow others to distribute derivative works only under a license identical to the license that governs your work.

**Public Domain Dedication (CC0) means:**

You, the copyright holder, waive your interest in your work and place the work as completely as possible in the public domain so others may freely exploit and use the work without restriction under copyright or database law.

**Public Domain Work means:**

scharrvids

Published on 26 Feb 2013

SUBSCRIBED 593

# Not one size fits all

- Screencast - if you want to capture something from your screen (you don't have to be in the video)
- Animation - Effective way to make videos on a variety of topics (you don't have to be in the video)
- Video Camera - More professional, but useful for high profile videos such as promoting your services.
- Vlog - Video piece to camera which can be recorded on the fly using your own smartphone. Good for short, less formal video recordings.

# Video dominates the web

- Globally, IP video traffic will be 82 percent of all consumer Internet traffic by 2022, up from 73 percent in 2017
- Cisco - Cisco Visual Networking Index: Forecast and Methodology, 2016-2021
- "Every second, a million minutes of video content will cross the network by 2021"
- [http://www.cisco.com/c/en/us/solutions/collateral/service-provider/ip-ngn-ip-next-generation-network/white\\_paper\\_c11-481360.pdf](http://www.cisco.com/c/en/us/solutions/collateral/service-provider/ip-ngn-ip-next-generation-network/white_paper_c11-481360.pdf)

(last accessed 16/05/2019)

# Helps make your content mobile friendly

# Downsides of video

- They can go out of date - keep them short
- Access issues for NHS staff via certain platforms
- Not everyone wants to be on camera
- Could reveal sensitive information (on screen)
- Success depends on audience and whether

# Screencast-o-Matic

## What is it?

Screencast-O-Matic makes screencasting free and easy, with one-click screen capture, online or you can download and install the application on PC or Mac OSX.

## What platforms does it work on?

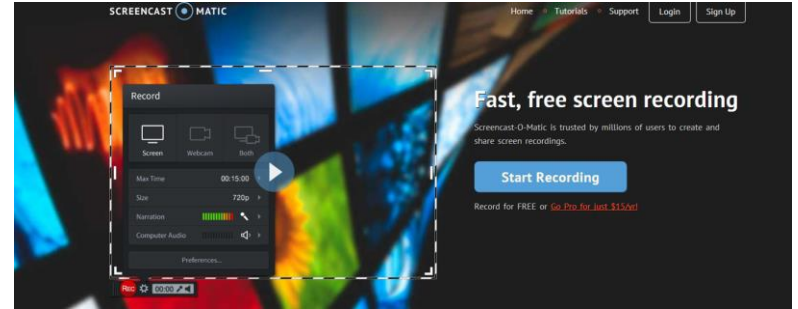

Online - but you can download it for use with PC and Mac

## How much does it cost?

FREE for 15 minutes of recording; Go Pro for \$18 dollars a year

## How do I get it?

<https://screencast-o-matic.com/>

# Screencast-o-Matic

## What can I use it for?

Ideal for on-screen tutorials, presentations, how-to Guides, FAQs.

## How easy is it to use?

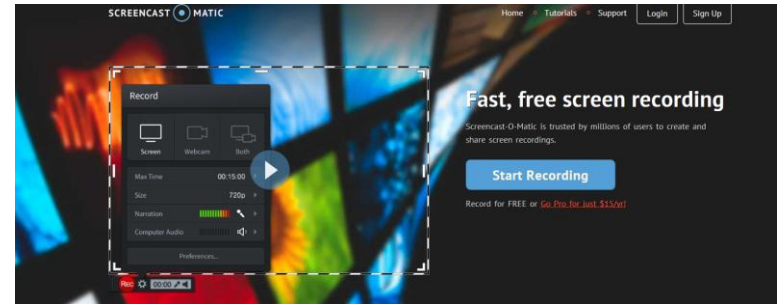

It is really very easy to use. You select what area of the screen you wish to record (including the full screen) and decide whether you wish to include your own webcam. Once you are ready to record, you simply press the record button and following a countdown (3,2,1) you are recording. The free account is capped at 15 minutes of recording time (which is often more than enough). Once you have recorded your video you can export in a variety of formats (including mp4) and upload to YouTube or other video hosting sites. Also includes a simple editing tool.

## Are there support materials?

Yes - lots of help and guidance on the website

## Case Studies?

No - but it is simple to use and there are lots of simple ways you can use it in your library service.

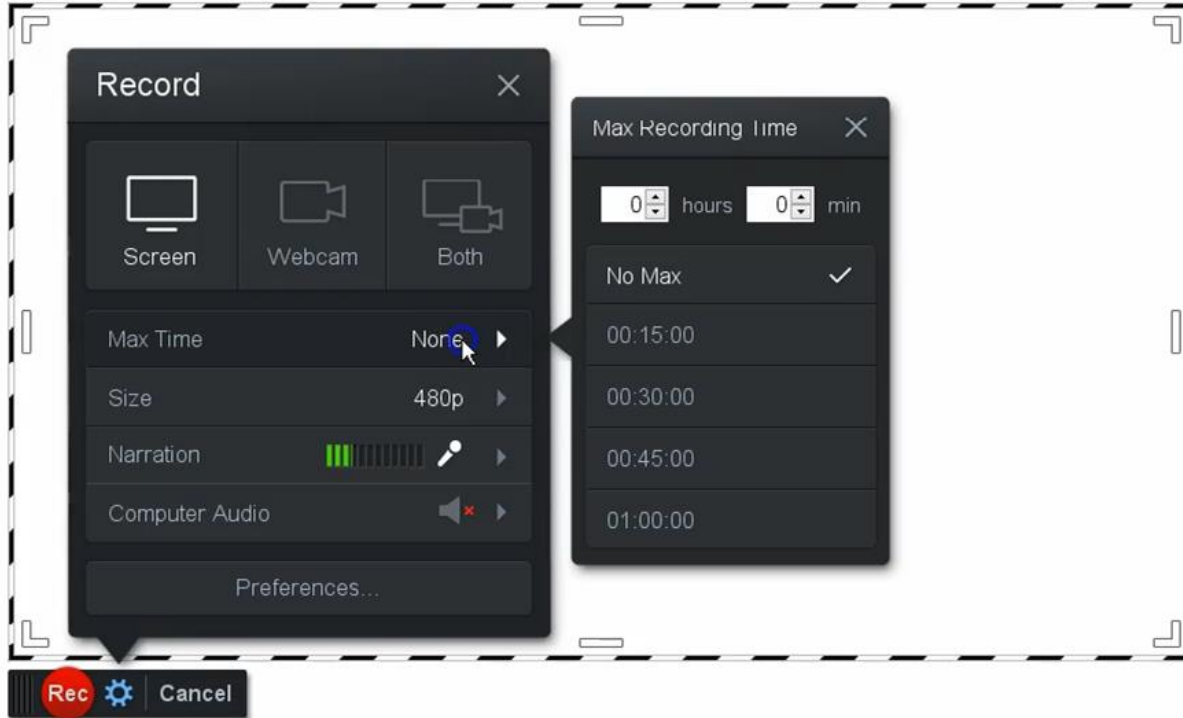

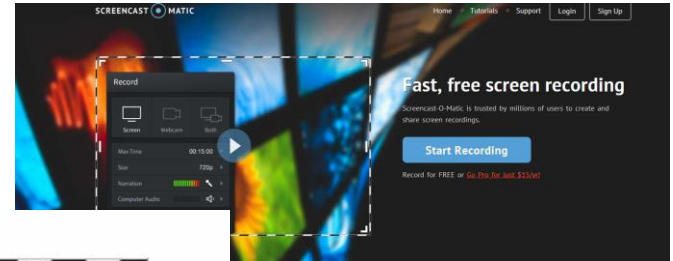

# Screencast-o-Matic

- A good idea or a problem to solve!
- Try to plan what you want to say (but you do have the option to pause your recording)
- A recording device - iPad - laptop/computer (with microphone and headset)
- Somewhere relatively quiet to talk (I do mine at home!)
- Remember to share and promote your screencast.

# ScreenCast-o-Matic

# Adobe Spark

## What is it?

Adobe Spark allows you to create professional looking, high impact posters with little effort. You can create animated presentations with audio and record it to share on YouTube and other platforms. Uses royalty free images and clip art. You can create social banners for Facebook, Twitter and LinkedIn.

## What platforms does it work on?

All web browsers and IOS App

## How much does it cost?

FREE

## How do I get it?

<https://spark.adobe.com/>

# Adobe Spark

## What can I use it for?

Creating tutorials, marketing and awareness materials.

## How easy is it to use?

The animation tool is very intuitive, you can easily rectify mistakes, all you need is to prepare a script, find a nice quiet space and hit record.

## Are there support materials?

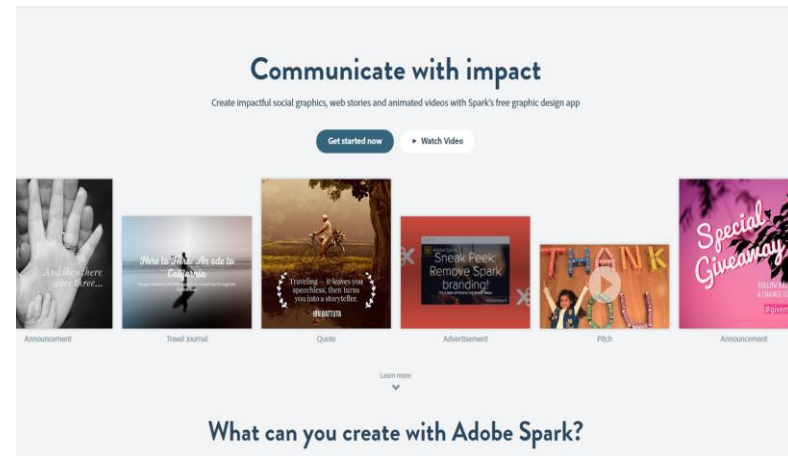

Adobe Spark Support <https://adobespark.zendesk.com/hc/en-us/categories/202688167-Adobe-Spark>

Research Hacks

<https://www.slideshare.net/tatman303/research-hacks-uksg-forum>

<https://www.youtube.com/playlist?list=PL1mJ7IZ3qFxiR8HhL9HX-ETHUFJz639Bt>

# Adobe Spark

## **To Make an effective Adobe Spark video you need**

- An idea/reason
- A Script
- A recording device - iPad - laptop/computer (with microphone and headset)
- Editing software - Camtasia/Movie Maker/iMovie (if you want to do more with your presentation)
- A Hosting platform - Vimeo/YouTube/iTunes U/Kaltura
- Social media presence to communicate and share your newly made videos

# Adobe Spark

## Tips for a good recording

- Be relaxed
- Find a good room where you will not be disturbed
- Find a room with good acoustics
- Use your own images if you have them
- Try not to go over 4 minutes - maximise your impact
- Feel free to be less formal - make it easier for the person to view your content

# Part 2 - working with the media and tracking your outputs

**@Andy\_Tattersall**

**"RESEARCHERS HAVE  
FOUND"**

# THE PROBLEM

- The media do not know enough about the reporting of research - open access, statistics, results, conclusions
- The media don't really care - and know what they are doing - they want to sell papers
- Churnalism
- Media teams do not share enough of the important information
- Academics are not in control of interviews with the media
- Altmetrics cannot pick up links that do not exist

# Sheffield scientists find nine new arthritis genes

6 hyperlinks to adverts

3 mentions of the word 'researchers'

6 mentions of the word 'scientists'

1 mention of the word 'lead scientist'

0 mention of who these researchers are

0 links to the published research

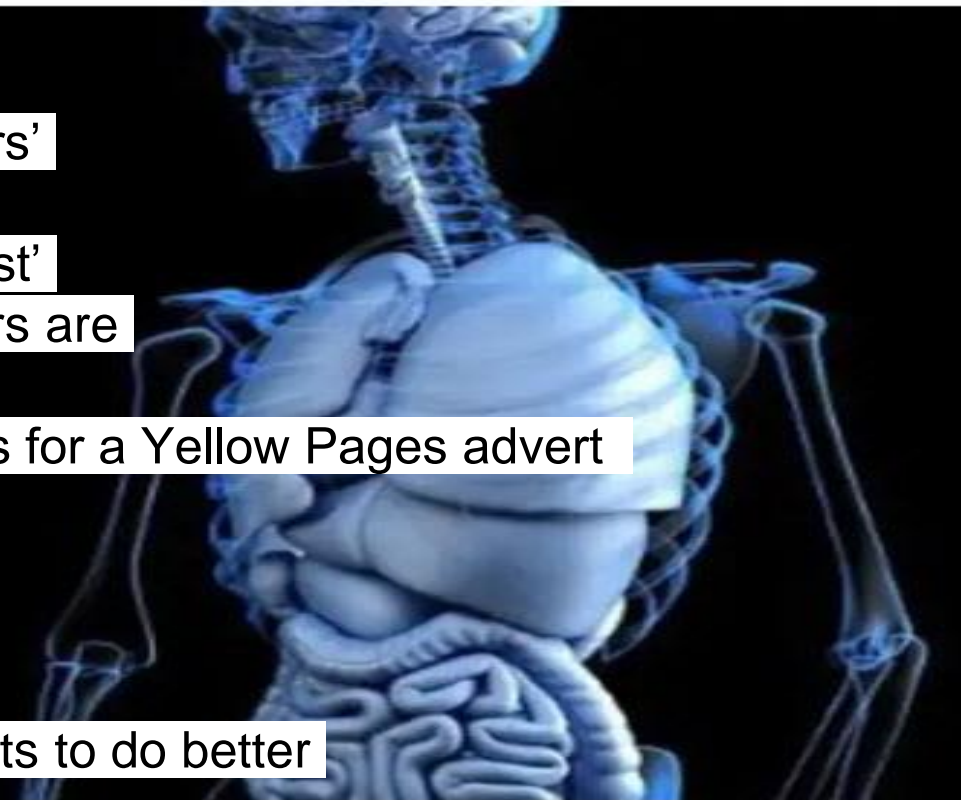

1 link to the journal (Nature) but it's for a Yellow Pages advert

0 links to the department

0 links to the academics

1 mention of the journalist's name

Churnalism - we can help journalists to do better

# WHO DID THIS RESEARCH?

## WHO

Who are these experts?  
Do they have a staff  
profile,  
contact details?

## WHERE

Which department?  
Is this a collaboration?  
Who funded it?

## WHAT

What have they really  
found?  
Can we see it?

# WHY DO THE MEDIA NEED TO LINK TO OUR RESEARCH

## IMPACT

Coverage of research may lead to impact

## REF

This impact can form part of impact case studies and contribute to the REF.

## FACTUAL ACCURACY

Interested parties - charities, funders, citizen scientists, patient groups, members of the public can read the research for themselves

# OF A STORY THE LIFE CYCLE OF A STORY

Social media is a ticking time bomb for universities with an outdated web presence.

Tweet 420

Share / Save ▾

*There are pressing questions academic institutions will need to address over the next couple of years regarding their expanding participation in social media streams. **Andy Tattersall** argues that with such blurred boundaries of ownership, access and support, what is needed is wide-scale demystification to help academics dovetail a few choice tools to bring how they work into a modern setting. Social Media, Altmetrics and Web 2.0 all afford academia a wealth of possibilities if they take it, but there is a risk that the important messages will get*

*lost as we produce even more social data than we can imagine.*

# New research must be better reported, the future of society depends on it

# The benefits of research blogging

"As well as reaching a far wider audience, the best thing about blogging has been the practice in writing for non-specialists, which is more and more important in these interdisciplinary times!"

"The process of writing helped me to think about my own research narrative. Pulling out the implications of research I'd done for a non-academic audience forced me to focus on the key messages of the research and what it meant in the real world."

"It was an interesting exercise and definitely helped communicate my research to people who almost certainly would not have encountered it otherwise; it did also appear to lead to a "hike" in online views of the paper, which the blog linked to. The increased visibility of the paper might lead to higher numbers of citations than it might have received otherwise"

## When it comes to information overload, we're like frogs in boiling water

logged in via Facebook

Gruesome metaphor, and scientifically inaccurate, too. Check "Snopes" for the full story.

**Andy Tattersall**

Information Specialist, [University of Sheffield](#)

In reply to

This is just a metaphor despite having a link that says otherwise. Like I said in a previous response, I don't condone the boiling of frogs for a second, anyone who does that is an idiot - and certainly not to prove the theory of information overload. I like frogs, they live just outside my back door, thankfully for them they have never heard of the Internet ;-) <https://archive.org/stream/studiesfrombiol00martgoog#page/n415/mode/2up>

Stop spreading this frog and boiling water nonsense. It isn't true, but if it is repeated enough times SOME people will believe it. Ostriches don't put their heads into holes either. And, yes, you do use more than 10% of your brain!

QUARTZ

Quartz

4 Questions you will need to address before starting

1. Will I respond to comments?
2. Am I likely to get into trouble doing this?
3. Do you realistically have the time?
4. Am I sure I can mention my work online?

# What to blog about?

- Any creative outputs - presentations, papers, videos, podcasts.
- Updates from you, your colleagues, your team, department, faculty.
- Professional ideas, essays, thoughts.
- Hot topics - get involved in the discussion

Remember to acknowledge your funder, check for embargo and early reporting of results

## Who, What, Where, When, Why: Using the 5 Ws to communicate your research

 Tweet 275    [Share / Save](#) 

*A lay summary can be a useful approach to breaking down barriers and making research accessible. A good summary focuses on the important aspects of the research, but distilling this information is not always easy. A helpful starting point for identifying the key elements of a research story can be the 5 Ws. **Andy Tattersall** finds this approach might not work for every piece of research, but it has the potential to allow researchers to explore key themes and retain control of what they say and how they say it.*

This work is licensed under a [Creative Commons Attribution 3.0 Unported License](#) unless otherwise stated.

# The 5 Ws

**Who** - Who is involved in this research? The researchers, public, funder, publisher, other bodies.

**What** - What is your research about - what does it aim to achieve? What did you find out?

**Where** - Where did this research take place? In the lab, hospital?

**When** - When did this research take place?

**Why** - Why has this research been carried out?

**How** - Did you do this research - in simple terms

# How to write a blogpost from your journal article - In 10 Steps - Professor Patrick Dunleavy - LSE

1. Get your research paper down to less than 1000 words
2. Cut out the methodology
3. Get rid of the literature review - hyperlink any really useful ones - this is about your work
4. Experiment with a narrative heading - tell the reader in simple terms what you found out
5. Try to include a trailer paragraph (no more than 3-4 lines)

# How to write a blogpost from your journal article - In 10 Steps - Professor Patrick Dunleavy - LSE

6. Use your key findings for the main text of your blog - “Start off in a high impact way, ideally trying to begin with something motivating for readers — either a startling fact, a paradox resolved, a key summary statistic, or a great quote. For blog readers something topical linking to a recent development is often a good start.”
7. Include simple useful tables and charts - extract the most useful data to display (Blogs are colourful) - explain them
8. Formatting - Keep jargon and specialist language to an utter minimum. Keep paragraphs, sub-headings and sentences short
9. Finish your blogpost in a decisive and interesting fashion that leaves a lasting impression.
10. Make sure you link to your research and bio

# Essential tips for your blog

- Limit hyperlinks - Keep them on your blog, not somewhere else.
- Start strong - A good title to lure the reader.
- State the purpose of the piece from the first few lines for a news item.
- Use images to break up the text.
- Share via any social media links you have.
- Make your content Creative Commons so it can be reposted easily with attribution. (but check where it gets reposted)
- Enjoy writing, don't make it a chore.
- Ask colleagues/friends to peer review your work if you are lacking confidence.
- Link and integrate your blog to any formal web presences you have
- Moderate your comments
- Keep it regular if you can

# Altmetrics

**Impactstory**

**MENDELEY**

# Development of altmetrics

- To complement, not replace traditional metrics
- Help people understand how research is being received and used, and by who
- Not intended as an indicator of quality
- Can help provide further evidence of engagement and ‘societal impact’
- Give credit for research outputs other than articles

Complementary  
to traditional  
citation metrics

Score is an *indicator* and the  
underlying, qualitative data tells you  
who's saying what about research.

*alt* + *metrics*

Track attention to scholarly outputs across peer reviews, news, Wikipedia citations, policy documents, research blogs, bookmarks on reference managers like Mendeley, and mentions on Twitter.

Real-time, immediate feedback on attention to scholarly content

Track attention to a broad range of research outputs, e.g. articles, posters, data sets, working papers, code

Non-academic engagement matters: practitioners, general public, interested parties, communicators

Funders and other impact assessors want to see “broader” picture of engagement

# How do they populate the database?

## *3 things needed*

An *output*  
(journal  
article,  
dataset, etc)

An  
*identifier*  
attached to  
the output  
(DOI, PMID,  
etc)

Mentions in  
a *source we  
track*

# How does Altmetric aggregate online attention?

Follow a list of sources.

*E.g. blogs, news, policy documents, social media.*

Search for links to papers.

*Automatically link searching and text mining.*

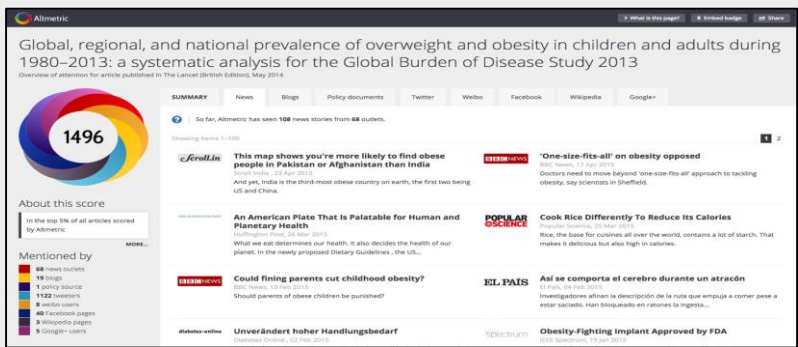

*Collecting attention data*  
*Reporting attention data*

Collate attention.

*Disambiguation of mentioned items across different versions.*

Display data in "Altmetric details pages".

*All research outputs with mentions have an Altmetric Details Page in our database.*

*Altmetric Details Page*

# Unique IDs Altmetrics track... more than DOIs

DOIs	General
ISBNs	Books
PubMed ID	Health Sciences
arXiv ID	Physics, Mathematics & Computer Sciences
ADS ID	Astrophysics data system
SSRN ID	Social Sciences
RePEC ID	Economics
Handles	General
ClinicalTrials.gov Records	Medicine/biomedical
URN	General

# Sources they track...*more* than social media

## News outlets

- Over 1,300 sites and growing every day
- Manually curated list
- Text mining
- Global coverage

## Academic blogs and social media

- Twitter, Facebook, Google+
- *Public posts only*
- Manually curated list
- Almost 10K academic/field specific blogs

## Post-publication peer review

- Publons
- PubPeer

## Reference managers

- Mendeley, CiteULike
- Reader counts

## Other sources

- Wikipedia
- YouTube
- Reddit
- F1000
- Pinterest
- Q&A
- Citations (by end of 2016)

## Policy documents

- APO – for Australian Content
- NICE Evidence
- Intergovernmental Panel on Climate Change
- Many more...

# Policy documents

- AWMF - Association of Scientific Medical Societies
- European Food Safety Authority (EFSA)
- Food and Agriculture Organization
- GOV.UK - Policy papers, Research & Analysis
- Intergovernmental Panel on Climate Change (IPCC)
- International Monetary Fund (IMF)
- Mental Health Foundation (UK) - NEW
- NICE Evidence
- UNESCO
- World Health Organization (WHO)

More being added each week...

# How not to miss a mention

-  Always link to a page that includes your research's unique identifier (e.g. DOI or PubMed ID) - for example the publisher page.
-  The link needs to be in the main body of the post – Altmetric can't pick up any links included in headers or other sections of the page (e.g. in a blog post).
- 

Altmetric needs to be tracking the source mentioning the work. Check if the source is being tracked: [support@altmetric.com](mailto:support@altmetric.com)

# Traditional metrics struggle to reflect this

- Slow to accrue
- Focus mostly on published articles

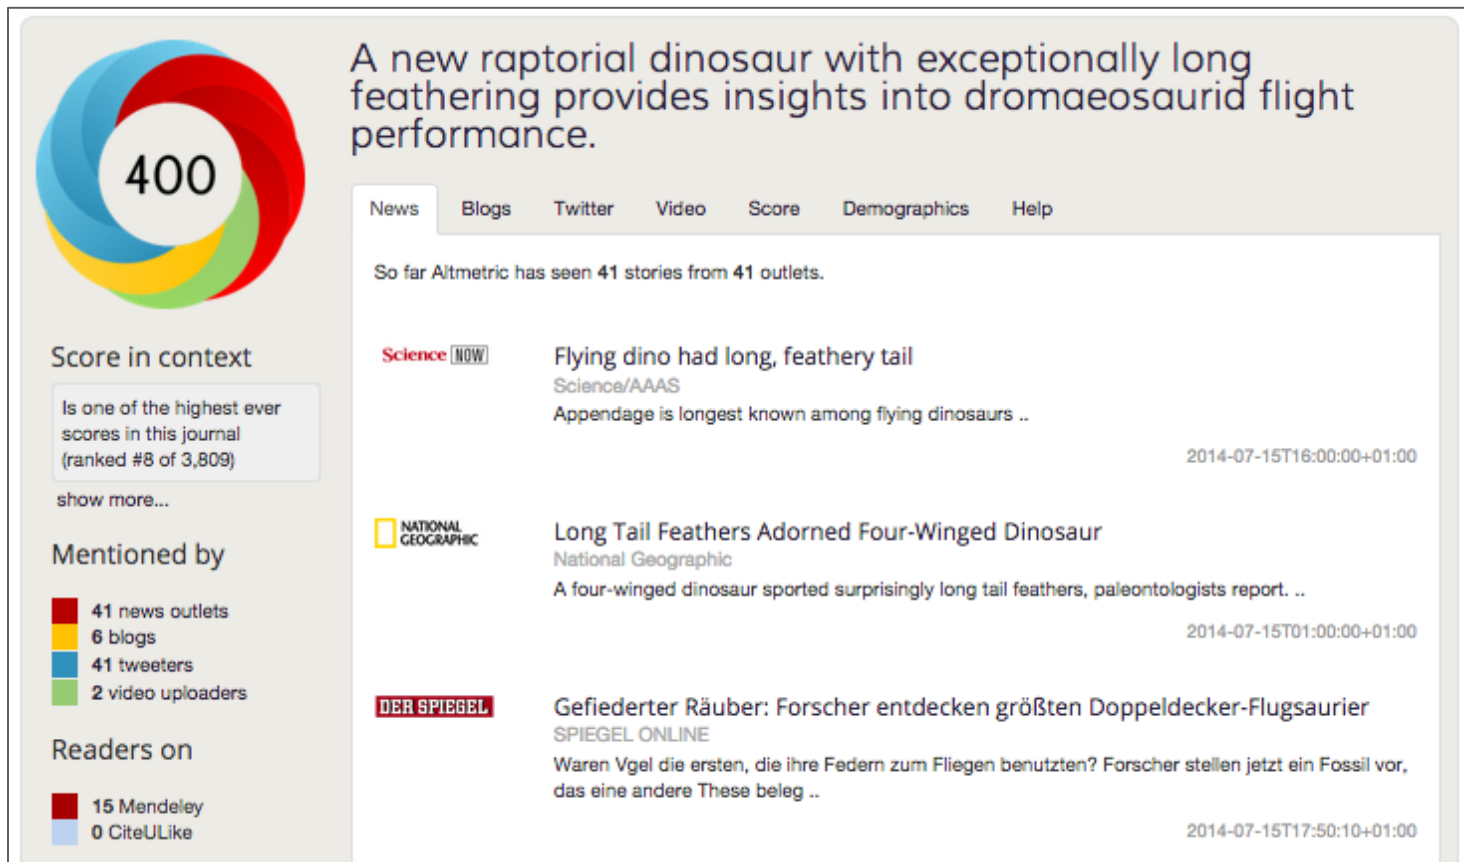

Published

June 2014:

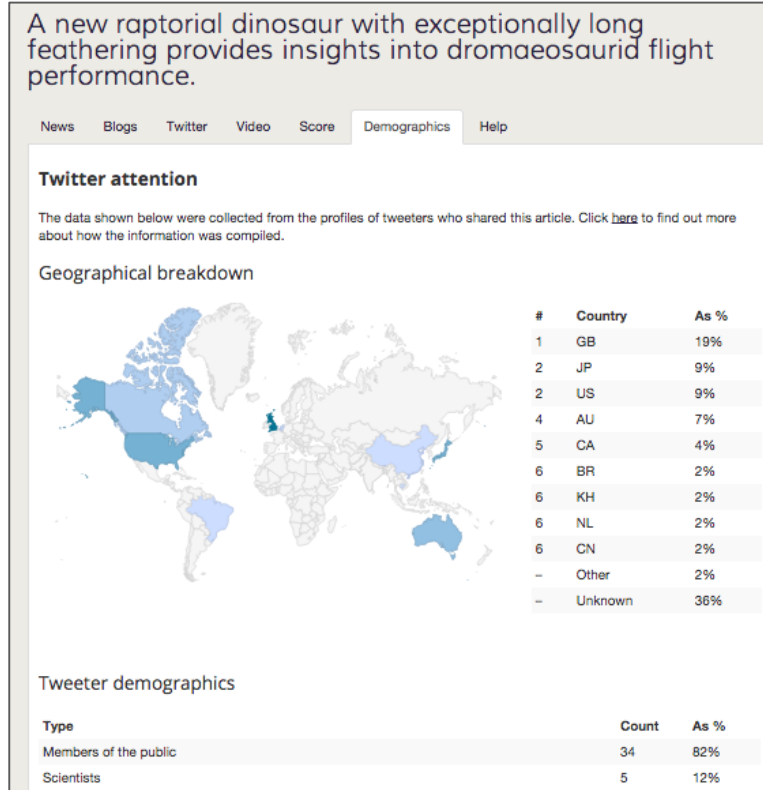

# Digging into the data

# Demographics

Twitter data from bio's

Mendeley data based on who has saved the article to their library - anonymised

# The Altmetric score and donut

- developed to give an at-a-glance summary of the attention work has received
- **not an indicator of quality of the research!**
- useful when looking at data for lots of articles at once

Volume	Sources	Authors
The score for an article rises as more people mention it.	Each category of mention contributes a different base amount to the final score.	How often the author of each mention talks about scholarly articles influences the contribution of the mention.

# Context

The Altmetric score is one measure of the quality and quantity of online attention that this article has received. You can read about [how Altmetric scores are calculated](#) here.

This article scored **399.73**

The context below was calculated when this article was last mentioned on **20th August 2014**

---

### Compared to all articles in Nature Communications

So far Altmetric has tracked 3,809 articles from this journal. They typically receive a lot more attention than average, with a mean score of 24.2 vs the global average of 5.0. This article **has done particularly well**, scoring higher than 99% of its peers. It's actually **the 8th highest scoring article** in this journal that we've seen so far.

In the	Ranks
<b>99%</b> ile	<b>8th</b>

---

### All articles of a similar age

Older articles will score higher simply because they've had more time to accumulate mentions. To account for age we can compare this score to the 76,775 tracked articles that were published within six weeks on either side of this one in any journal. This article has done particularly well, scoring **higher than 99% of its contemporaries**.

In the	Ranks
<b>99%</b> ile	<b>94th</b>

## 0 is the magic number: Why small numbers matter just as much as large ones when we talk about altmetrics.

*The problem many detractors have with altmetrics as a concept is that it seems heavily focused on numbers that may or may not be meaningful. **Andy Tattersall** sees this as a legitimate concern but argues researchers should consider further what can be gained from these scores, or indeed, the lack of one. In a world increasingly governed by impact and the dissemination of your research, the straight flat zero indicates an opportunity and a possible need to communicate your work.*

A lot has been written in the last couple of years about altmetrics and the score that comes with them. Whether that be the Altmetric.com, ResearchGate or Kudos' score to name but a few. Some of the tools focus in different areas with Altmetric.com being one that tries to capture a broad range of data from scholarly and public communications. With that comes their own Altmetric.com score that is weighed depending on what platform was used. For example, a Tweet is worth one point, a blog post five and a news article eight. Hence with so many of these metrics, including traditional ones like the impact factor score, h-index and citation count, the bigger the number the better. With Altmetric.com that may be good but not wholly useful, as small numbers, especially 0 can tell us a lot too.

This work is licensed under a [Creative Commons Attribution 3.0 Unported License](#) unless otherwise stated.

## Evernote Impact Tracking

Universities and funders increasingly require researchers to record evidence of their research impact, creating an additional administrative burden on already busy people. As a result, few researchers engage regularly with impact monitoring systems and important evidence may be lost.

How to make an infographic CV featuring impact that you could actually submit with your next grant application

[OVERVIEW](#)[ACHIEVEMENTS](#)[MENTIONS](#)[PUBLICATIONS](#)

### ACHIEVEMENTS

[view all](#)

#### Global Reach <sup>66</sup>

Your research has been discussed in 7 countries. That's high: only 34% of researchers have their work as widely discussed.

 Your tweeters come from Argentina, Canada, France and 4 more.

#### Greatest Hit <sup>65</sup>

Your most discussed publication has been mentioned online 15 times. Only 34% of researchers get this much attention on a publication.

 Your greatest hit online is *For what it's worth - The open peer review landscape*.

#### All Readers Welcome

Your writing has a reading level that is easily understood at grade 6 and above, based on its abstracts and titles. That's great — it helps lay people and practitioners use your research. It also puts you in the top 1% in readability.

### 4 ACHIEVEMENTS IN engagement

**Engagement** is about *how* people are interacting with your research online. What's the quality of the discussion, who is having it, and where? You can see all the possible Engagement achievements on their [help page](#).

You've earned 4 so far:

#### Global Reach 66

Your research has been discussed in 7 countries. That's high: only 34% of researchers have their work as widely discussed.

🔗 Your tweeters come from Argentina, Canada, France and 4 more.

#### Global South 61

More than 5% of people who mention your research are in the Global South. This puts you in the top 39% of researchers.

🔗 Countries include Argentina.

#### Follower Frenzy

Someone with 3.9 thousand followers has tweeted your research.

🔗 Thanks, @SPARC\_EU.

#### Labmates

Around 3% of your online attention is from scientists. The average scholar in our database receives about 30% of their attention from other scientists.

#### Submission Requirements

1. Directly link to published peer-reviewed research articles or a brief media summary
2. No summaries of summaries, reviews or popular reposts (over 100 upvotes)
3. Research must be less than 6 months old
4. No sensationalized titles, all titles must include the model where applicable
5. No blogspam, images, videos, infographics
6. All submissions must be flaired and contain a link to the published article, either in the submission link or as a standalone comment.

## Biography

### Biography

- I joined SchARR in 2001 after working as a journalist with my remit to provide support and guidance to staff and students in their use of technology and information resources. My role is to scan the horizon for opportunities relating to research, teaching and collaboration and maintain networks that support this. I have a keen interest in new ways of working by employing Web 2.0 and Social Media including video but also pay close attention to the implications and pitfalls for using such advances. I offer guidance and support on information literacies and digital copyright. My main areas of work are in digital academia, scholarly communications, Web 2.0, social media, Google Apps, Altmetrics, MOOCs, infographics and the Web.
- I regularly write and give talks about digital academia, research and learning technology, scholarly communications, open research, web tools, altmetrics and social media. In particular, their application for research, teaching, learning, knowledge management and collaboration. I have a Senate Award for Excellence in Learning and Teaching at The University of Sheffield. I am also a Senior Fellow of the Higher Education Academy. I received my Senate Award in recognition as being the person who sparked interest in running the first MOOCs at my institution in 2013.
- I started the SchARR Bite Size series - where we teach you something new in 20 minutes, a model which has been replicated at various universities around the globe. I established the popular SchARR Library Blog in 2007. I am also the Chair of the Chartered Institute of Library and Information Professionals Multi-Media and Information Technology Committee. I run occasional App Swap Breakfasts at institutions and conferences and a weekly academic writing club in SchARR.

# Tips for Authors

Ensure your research reaches the widest possible global audience, is eligible for submission in research assessment exercises, and fulfils funder requirements.

Here are eight tips for academic authors to tune up their research profile:

<b>1. Make your work Open Access</b>	Open Access (OA) papers benefit from wider readership and higher citations. Also some research funders require you to make your research open. To be eligible for submission to the next REF you need to deposit your manuscript into our institutional repository (PURE) immediately upon acceptance.
<b>2. Use your name consistently</b>	Decide how you would like your name to appear in publications and then stick to the same format which will make it easier for your work to be identified and correctly attributed to you.
<b>3. Use an ORCID identifier</b>	ORCID is a digital identifier which uniquely identifies authors. If you have an ORCID ID then you can use it in grant applications and research publications to distinguish yourself from authors with similar names.
<b>4. Institutional affiliation</b>	Always include the phrase "University of Edinburgh" somewhere in the author affiliation section of any research publication. Doing this will ensure that citations relating to your publications will be correctly attributed in various bibliometric databases.
<b>5. Acknowledge your funder</b>	In the acknowledgements section of your paper include the funder(s) and grant number(s). It should take the form of a sentence with the funding agency written out in full, followed by the grant number in square brackets.
<b>6. Research Data</b>	You should include a statement in your publication detailing the location and accessibility of underlying research data. This is a requirement for certain research funders.
<b>7. Cite the DOI and OA links</b>	When you are sharing your research, include the DOI (Digital Object Identifier) in tweets, blog posts, press releases etc., as this will help to ensure that usage of the article is tracked using services such as Altmetric.com. If you have an OA link then include that as well.
<b>8. Claim your digital space</b>	Services such as Academia.edu and ResearchGate can be useful tools in helping to promote your research. We advise authors to ensure that publications are first deposited in PURE to meet research-funder requirements, and then use OA links in these external services.

# Action plan

- Make sure you have a DOI (Digital Object Identifier) for your outputs
- Get an ORCID account
- Update your Google Scholar profile
- Try Twitter (at least to see what's going on)
- Put your presentations on to Slideshare (check copyright first)
- You are ALL experts in something - write an expert article for such as The Conversation

$$K - index = \frac{F(a)}{F(c)}$$

The definition of insanity is doing the same thing over and over and expecting a different result

**Thank you**
