'Research continues to increase our knowledge of what can be done to improve the care of residents in care homes, but there is a persistent gap between this knowledge and the care that people receive.'

- Standard scoping review methods
- Data tabulated and classified using Kitson's Fundamentals of Care
- Strategies coded using EPOC taxonomy & ERIC compilation
- Findings discussed with group from Devon Care Kitemark

#### **Dissemination:**

'the targeted distribution of information and intervention materials to a specific public health or clinical practice audience, the intent of which is to spread knowledge'

#### Implementation:

'the use of strategies to introduce or change health and social care interventions within specific settings' **Definitions** 

What we found

### Conclusions

Much of the evidence is of poor quality and is poorly reported We have identified some gaps in the evidence & some clusters of evidence for SR?

Continued discussion with care home community to establish what next? This work gave rise to many methodological challenges (see poster 101)

This project is supported by the NIHR Collaboration for Leadership in Applied Health Research & Care South West Peninsula (PenCLAHRC). The views expressed are those of the author(s) and not necessarily those of the NHS, the NIHR or the Department of Health.
